## PROFILE

As an experienced Software Developer, I bring forth expertise in design, deployment, and maintenance of software systems. I am equipped with a diverse and promising skill-set, proficient in numerous modern software technologies such as **.NET Core, Azure, Linux, WebRTC, and cognitive services (AI)** from Microsoft and IBM. Additionally, I am knowledgeable about various DevOps tools, including **Ansible** and **TeamCity**, and proficient in software design methodologies. Familiar with the latest cutting-edge development tools and procedures, I am capable of effectively self-managing during independent projects, while also possessing the ability to collaborate as part of a productive team or lead such a team.

# JAROSLAV ČECH

Head of R&D, Tech lead, senior programmer or consultant

## EDUCATION

**Faculty of Electroengineering (FEL) Prague**
Finished with master degree

## WORK EXPERIENCE AND ACHIEVMENTS

**Contract Programmer and Manager**
2021-present
I am participating in several projects for enterprise companies (such as **O2, PPL, CEZ, ewing, HomeCredit Kazakhstan,** etc.) in the roles of programmer, team leader, or technology auditor.

**O2 R&D Manager, Integration specialist**
2016-–2021
After the acquisition of mluvii, I transitioned into the roles of R&D manager and integration specialist. I frequently collaborated with the integration teams of enterprise companies.

**mluvii Tech Lead**
2005–2016
mluvii was established in 2005 by myself and my wife. Originally, it was a small company that developed internet-based communication tools - including text chat, video chat, and telephony. Utilizing cutting-edge technologies, mluvii was one of the first companies to start using WebRTC and AI in their products. The company was acquired by O2 in 2016.

**BMW Munich  Fullstack developer**
1999–2005
I was part of a small team that developed an internal tool for BMW, known as PPC (Permanent Product Control), which is used company-wide (20k+ users). This tool is utilized for reporting and decision-making related to the design of new car models and feedback on existing models.

## SKILLS

My skills include interpersonal communication and leadership, complex problem-solving, technology pathfinding, and auditing existing IT systems. I have a deep practical understanding of a number of modern technologies. I am fluent in English, German, and Czech.
